The Bank has applied the IFRS reporting and valuation principles THE GROUP In preparing this Interim Report, the Bank of Åland has applied the accounting and valuation principles prescribed by International Financial Reporting Standards (IFRS). The Group's Annual Report for 2005 will be prepared according to the IFRS standards approved by the European Union. Comparative figures and financial ratios for last year have been recalculated according to the above- mentioned standards. However, in accordance with IFRS 1, the Bank has taken advantage of the opportunity to present the comparative figures related to financial instruments according to previously applied accounting principles, which affects their comparability to some extent. Earnings During the first half of 2005, consolidated net operating profit amounted to EUR 8.8 M (7.3). This was an improvement of more than 20 per cent compared to the corresponding period of 2004. Net interest income Despite the continued narrowing of customer margins, larger total deposit and lending volumes led to an increase in net interest income by 6.2 per cent to EUR 15.3 M (14.4). Other income Commission income rose by a full 23.7 per cent to EUR 7.7 M (6.2). Income from asset management and from providing investment products rose the most. However, net income from securities trading for the Bank's own account represented a loss of EUR 0.4 M (+0.4), which was essentially explained by changes in valuation principles. Expenses Staff costs rose by 16.1 per cent to EUR 10.3 M (8.9). Other administrative expenses (office costs, marketing, telecommunications and computer costs) rose to EUR 4.4 M (3.9). Production for own use amounted to EUR 0.9 M (0.0) and was related to computer software, which in accordance with IFRS must be capitalised.
